

SERVICES

YOUR PARTNER IN ELECTRICAL AND LOW VOLTAGE EXCELLENCE

If you are looking to add to your facility management by controlling access to exterior or interior doors, then look no further. To stay on top of new ideas and technology for open door access, Shea Electric & Communications, LLC, has partnered with the industry leader, Galaxy Control Systems. Learn how these high-quality products will benefit your business and create accountability!

OPEN OPTIONS, INC.

COMPANY OVERVIEW

Galaxy Control Systems is a forward thinking, independent business that distributes an array of quality access control products for customers who embrace the distinct advantages of the open architecture concept. Customer satisfaction is the company's number one priority and this is achieved through responsive, professional service and a quality product line that is designed and manufactured in the USA.

PRODUCT LINE

Featuring the most advanced line of access control technology that is scaleable from one door to 1,000s. Galaxy Control Systems offers three distinct product levels, Professional, Corporate and Enterprise to fit each customer's needs.

PERKS OF PARTNERSHIP

The partnership between Shea Electric and Galaxy Control Systems is a natural fit as both companies are focused on providing superior customer service and developing long-lasting client relationships. This collaboration also allows end users the most diverse selection of access control technology customized to their unique business needs.
